

# Try the new Estiluz App!

The **Estiluz App** for iPad devices represents a revolutionary way to display lamps using **augmented reality** technology, which allows you to visualize the product in real size, in any space.

The number of products will be increased in later versions. Moreover, an Android version will be available and other features will be added.

[Estiluz App](#)

## Instructions

### START USING THE APP

- 1 Download the App from **Apple Store** (search **Estiluz**)
- 2 Print the markers from

The PDF on product page labelled **Estiluz App markers**

The App requires **3 markers**:

**Wall sconces (A) - Suspension and flushmounts (T) - Floor and table lamps (P)**

- 3 Position the **marker** on the spot where you want to place the product
- 4 Open the App on your **iPad**, point your mobile device and see the product in 3D. Please note that the marker needs to be illuminated and in a relatively short distance from your iPad. Once the App is working, you can move back, without losing focus on the marker, to get the full perspective of the space with the product.

## Features

- 1 **Rotation** - Sliding your finger horizontally on the screen will rotate the luminaire.  
By selecting it, you will be able to choose all finishes and accessories.
- 2 **Selecting finishes** - The button on the bottom of the screen will allow you to select different finishes available.
- 3 **Accessories** - Same as with finishes, some luminaires offer accessories and different color shades. In this case, a + symbol will appear.
- 4 **Take a picture** - Click on the camera to take a picture of the setting of the virtual image. The picture can be saved in the photos folder on the iPad, sent by e-mail, shared in twitter or published in Facebook.
