The Heat Is On!

GARAGE / WORKSHOP Portable Unit Heater

Ceiling Mount

Wall Mount

This portable electric unit heater provides the climate control you need for your garage or workshop areas. The built-in rotational knob adjustment allows for various mounting configurations, such as the floor, wall, or ceiling mounting applications.

This heater series operates on 240 or 280-Volt, single phase electrical service and generates 4.0 to 5.6kW of heat (10,239 to 19,107 BTU's). Simply use the supplied 6' long cord and plug, or field converts for direct wire applications. Heater also includes:

- Temperature control thermostat
- Manual reset thermal cut-out switch
- Red power light indicator
- Mounting bracket & aiming handle
