This WorkStation increases your rebar cutting production.

DIAMOND®

CWS-2025

This WorkStation is the perfect height for increasing your rebar cutting production. It's designed to securely hold the **DIAMOND** model DC-20WH or DC-25X rebar cutter. **Now you can operate your portable rebar cutter hands free with just a foot switch.** The DC-20WH or DC-25X rebar cutter can be removed for use in most portable applications. Workstation includes an electrical outlet for plugging in the rebar cutter and a foot pedal switch. (Rebar cutters and foot operated switch are sold separately)

- Sturdy design with a 12-gauge heavy-duty galvanized sheet metal worktop.
- Designed for stationary mounting of the DC-20WH or DC-25X rebar cutters.
- Includes an electrical duplex & foot pedal outlet for hands free rebar cutter operation with an optional foot pedal (1BR5130 foot pedal sold separately).
- The rebar cutter can be mounted in a stationary position in the WorkStation or easily removed for use in any portable application (just unbolt & unplug).
- Modular design allows for other WorkStations to be bolted together.
- Shipped partially assembled complete with hardware and instructions.
