

Cleaning Instructions:

Fine wood furniture should not be exposed to extreme heat or humid conditions. Do not place your furniture in direct sunlight or in a damp area. Avoid arranging your furniture so that it is placed in front of or over heating and air conditioning vents.

Do not place plastic, rubber or hot objects on your wood furniture. Chemicals in such objects may soften or discolor the finish. To avoid such damage, apply a strip of felt, leather or cork under accessories. Also, occasionally rotate accessories so they do not remain in the same spot for extended periods of time.

Lift objects from the top surface rather than dragging them across the finish when moving them.

Use a protective pad when using your furniture as a writing surface (especially when using a ballpoint pen).

Small scratches that occur with normal use can be touched up with a scratch remover or special touch-up pens or sticks available at your furniture dealer or at many paint stores.

Dust frequently with a clean dry, lint-free cloth. For a more thorough cleaning, the furniture may be washed with a mild soap and warm water. Dry thoroughly using a clean, lint-free cloth wiping with the grain. A furniture polish may be applied for more shine. We recommend this type of cleaning every six months to remove accumulated dust and old furniture wax build-up.

Spilled liquids should be wiped from the surface immediately
