

WondaWedge

Inflatable Wedge Cushion with No-Slip Mat

- No-slip mat keeps wedge in place! Perfect for the beach, picnics, outdoor concerts, reading or recuperating in bed.
- Adjustable firmness and shape! Three different angles offer the user different sitting or reclining positions.
- Inflatable wedge is easy to pack and travel with.

Comfort and Convenience

Because the WondaWedge provides exceptional back support, this inflatable cushion works for both recreational use and recovery.

The WondaWedge is ideal for long term recuperation, sleep apnea, acid reflux disorder, or respiratory problems such as asthma, emphysema and snoring. For lengthy bed stays it's the only multi-position lounger that lets the user determine their own comfort level. Inflate it for sitting up and reading. Slightly deflated, use it to support the knees, or rotate it into a reclining position.

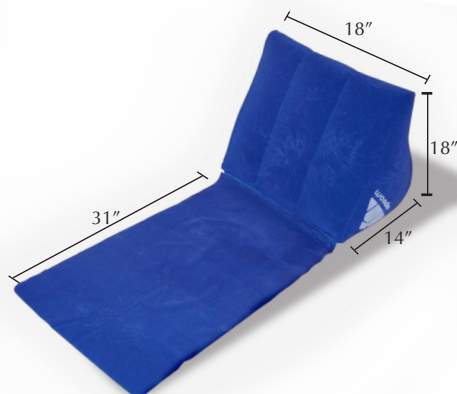

The WondaWedge is lightweight and inflatable, thus, space-saving, easy to carry, and easy to use. The suede vinyl material is waterproof and comfortable even in the heat. Use the WondaWedge to get comfortable support wherever you go.

Stays in Place without a Support Wall!

Unlike other wedge cushions, the WondaWedge doesn't need to be propped up against a wall in order to work. The unique design of the WondaWedge includes an attached mat that uses your own body weight to keep the cushion in place.

Quality Materials

The WondaWedge is made from flocked PVC, also known as "suede vinyl". The best method for cleaning is to use a soft brush and soap and water to gently scrub away dirt and grime. Allow to air dry before refolding for storage.
