Hitachi 2-Year HXP Lithium Ion Battery Warranty

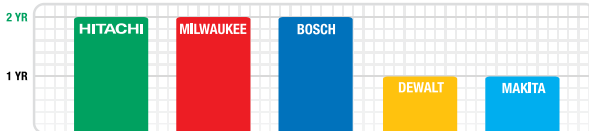

All HXP Lithium Ion batteries contain circuit protection technology that ensures proper maintenance so they will continue to operate at peak levels at all times. Hitachi is proud to offer an exceptional 2-year HXP Lithium Ion battery warranty to the original purchaser, which protects against possible defects in materials and workmanship from the original purchase date.

Lithium Ion Battery Advantage

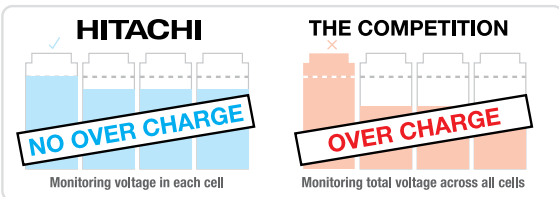

HXP Lithium Ion batteries have up to three times the lifespan of traditional NiCd or NiMH batteries. Where NiCd/NiMH batteries could be used for up to 500 charge cycles, HXP Lithium Ion batteries can be used for up to 1500 charge cycles!

Hitachi 1-Year HXP Lithium Ion Charger Warranty

Hitachi HXP Lithium Ion cross-compatible chargers feature built-in Cool Air Flow systems to maintain the optimal charging temperature. Hitachi offers a 1-year HXP Lithium Ion charger warranty to the original purchaser, which protects against possible defects in materials and workmanship from the original purchase date.

Patented Built-In Protection System

The Hitachi protection circuitry monitors each cell contained within the battery pack. This ensures each cell is only charged to its optimal level. Once a cell reaches optimal charge level, the charging function to that cell is stopped to prevent overcharging.

The Industry's Best Professional Lithium Ion Tool Warranty

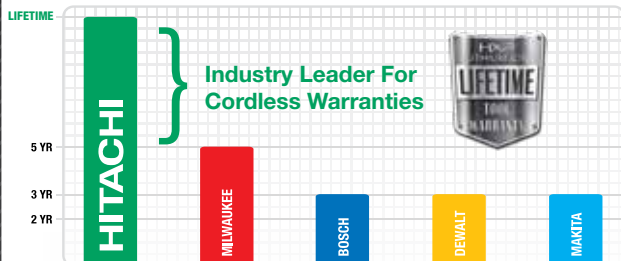

Lithium-Ion

LIFETIME PROFESSIONAL TOOL WARRANTY

Hitachi Lifetime Cordless Power Tool Warranty

Every Hitachi cordless power tool is designed to the highest standards and rigorously tested for both performance and durability. Hitachi is proud to offer an exclusive Lifetime Lithium Ion tool warranty* to the original purchaser on HXP Lithium Ion cordless tools, which protects against possible defects in materials and workmanship from the original purchase date.

*Some exceptions apply. Hitachi HXP Lithium Ion Grinders, HXP Lithium Ion Rotary Hammers and HXP Lithium Ion Gas Nailers come with a 1-year warranty. View the entire warranty with limitations online at www.hitachipowertools.com > customer service > warranty information.

Only Hitachi Offers a Lifetime Professional Warranty on HXP Products.**

Hitachi Lithium Ion Technology Protects the Tool & Battery

Hitachi Lithium Ion batteries operate within the optimal voltage limits, protecting both the tool and battery from damage. Protection circuitry built into each battery and charger monitors the charge and discharge for each individual cell.

This results in peak operating performance while in use or during regular charging.

Additionally, if a surge in power is detected during use, Hitachi's technology called "Over Current Protection" will temporarily shut off the power to protect the battery and tool from being damaged. This unique feature allows the power to return to normal optimal voltage thereby extending battery and tool life beyond any other competitive Lithium ion product.

Superior Quality Control

Hitachi Lithium Ion cordless products deliver superior power, while maintaining a lower weight when compared to previous models powered by traditional NiCd and NiMH batteries. With contractor grade construction, all HXP Lithium Ion tools meet the highest quality control standards first created by Hitachi engineers in Japan.

Hitachi participates with all Lithium-ion products to recycle 3.6 V – 18V Batteries. To find out more call 1.800.8.BATTERY.
